

IMAGE IN THE EM GUIDELINES

What information should be included in an Image in EM report?

We receive many interesting “Images” for presentation at the EuSEM congress. These include:

- Imaging
 - Plain films
 - CT scans
 - MRI scans
 - Ultrasound
 - Scintigraphy
 - SPECT
 - Angiography
 - Etc
- Clinical data:
 - Lab results
 - Interesting data
- ECGs
- Clinical images of patients (suitably anonymised)

To streamline the submission process, we would be grateful if you could adhere to the following structure. You do not need to enclose the images here but obviously they will need to feature in a chosen presentation.

Submission title:	
Nature of the image: <input type="checkbox"/> Plain film <input type="checkbox"/> CT scan <input type="checkbox"/> MRI scan <input type="checkbox"/> Ultrasound <input type="checkbox"/> Scintigraphy <input type="checkbox"/> SPECT <input type="checkbox"/>	

<p>Angiography</p> <p><input type="checkbox"/> Other: Specify</p>	
<p><u>Brief clinical details (80 words):</u></p>	
<p><u>Description of the relevant abnormalities (80 words):</u></p>	
<p><u>Why this image is clinically or educationally relevant? (50 words)</u></p>	
<p><u>Where patients' images are submitted please confirm you have adequate permission to use them. (compulsory question, no submission without an answer)</u></p>
